### **Comparative interpretation (the problems of its definition)**

#### **Abstract**

This study deals with one sort of interpretation, which is comparative interpretation. This is because of the problems this sort has suffered from regarding the trials of controlling its definition. This was done by conducting an empirical and analytical study that includes the interested scholars' opinions in the issue, and by having a quiet discussing scientific debate based on the reasonable scientific evidence, in order to achieve the objectives of this study and to get the questions answered so as to report their results.
